

## How KeyShield SSO works for INFORM GmbH

“I want to give you some feedback on how KeyShield SSO works for us. We have rolled out the agent as a modified msi-bundle via ZENworks (modified in a way that we added the wstclient.cfg to the package). There are about 250 users using KeyShield SSO now for Vibe 3.3 and eHelpdesk 10. We haven't heard a single complaint since the rollout and everyone is happy to get the SSO comfort.

So we are very happy with your solution. It's one of the few fire and forget solutions in our company. You've done a great job!”
