

Dragonfly
EDUCATION TRUST

Dragonfly Education Trust is a Multi Academy Trust based in the South West of United Kingdom that has approximately 1700 students and 200 staff across primary, secondary and specialist studio schools.

True SSO experience

Technology drives our digital classrooms that provides exciting, intuitive and inclusive tools to enhance the learning experience. **Keyshield SSO** enables us to securely and seamlessly deliver our applications and services by automatically authenticating our users to them based on their Active Directory identity, regardless of what device they choose to use such as **Windows, MacOS, iOS and Android**.

We started using **Keyshield SSO** in 2013 to deliver authenticated Internet access to users across multiple sites, helping us to meet three of our security objectives; authentication, accountability and non-repudiation. Since then, we have taken advantage of the plethora of services that **Keyshield SSO** supports authentication for, such as multiple internal **WordPress web applications** and other **RADIUS systems**. We plan to implement **Keyshield SSO** multi-factor authentication using hardware tokens to further enhance our security posture.

Keyshield SSO has a fantastic support team that upon request has built us a MacOS client that leverages Active Directory-issued Kerberos tickets for a true SSO experience.
